

# Photovoltaic energy storage funds

What types of funding programs are available for solar energy projects?

Funding programs encompass at least one research area: photovoltaics (PV), concentrating solar-thermal power (CSP), systems integration (SI), soft costs (SC), manufacturing and competitiveness (M&C), and solar workforce development (WF). For a list of individual projects, view our Solar Energy Resource Database.

What is a solar energy fund & how does it work?

The fund holds companies involved with solar energy, EVs, geothermal energy, energy storage, wind energy, and climate tech. It offers some diversification across sectors (industrials at 45%, consumer discretionary at 18%, IT at 15%, materials at 13%, utilities at 7%, energy at 1%, and financials at 1%).

Which energy storage stocks are a good investment?

Albemarle is the top holding, followed by Tesla, so if you can't decide from the previous stocks, this fund is a good one-stop investment to play the pending energy storage boom. With more than \$1 billion under management and about 60 components, this First Trust fund is another interesting and diversified way to play energy storage.

Why is energy storage financing so important?

The Energy Storage program's concessional financing has been crucial in securing a total of \$276 million through the Climate Investment Fund, the Green Climate Fund, and similar facilities to co-finance projects in Bangladesh, Burkina Faso, Cabo Verde, Central African Republic, Democratic Republic of the Congo, Maldives, Ukraine, and Zanzibar.

Are solar PPAs viable?

Solar PPAs are also viable when the solar project is not located on a government property, but the government receives the delivered electricity output. These so-called "Off-site" PPAs are popular with large energy users with insufficient space to host large solar arrays. A PPA is typically 15 to 30 years long.

What are some interesting energy storage ETFs?

Another interesting energy storage ETF is GRID, which is focused on alternative energy infrastructure companies such as power management company Eaton Corp. (ETN), industrial conglomerate Johnson Controls International PLC (JCI), and electronics and automation pioneer Abb Ltd. (ABB).

In 2023, Virginia ranked as the 9th largest producer of solar energy in the United States. Today about 13% of Virginia's total power is generated from solar plants (EIA, 2024), with more on ...

The US Department of Energy is funding a pilot project to demonstrate the commercial viability of storing energy in heated sand, which is capable of producing 135 MW of power for five days.
