

Solar panels sold on Pinduoduo

Does Pinduoduo have a new e-commerce platform in China?

But first, a bit of background When Pinduoduo launched in 2015, there was little room for a new commerce platform in China. Two major e-commerce platforms, JD and Taobao/TMall (sub brands of Alibaba), dominated online commerce in China, much like Amazon dominates in the US.

Why is Pinduoduo so popular in China?

Pinduoduo's low prices and WeChat prominence helped it take hold among China's poorer rural communities, who were historically under-served by platforms like Alibaba and JD.com as they predominantly sold higher-end and luxury goods. However, it's not just rural consumers that Pinduoduo appeals to.

How much does Pinduoduo cost?

The main appeal of Pinduoduo is its shockingly low prices. A 5.5-pound box of cherry tomatoes costs about \$4.50, but the price per box is cut in half if another person joins to make a "team purchase." A dozen rolls of five-ply toilet paper cost 80 cents. Both are delivered free.

Is Pinduoduo the most valuable Internet company in China?

Its 366 million monthly active users trail only Alibaba, outranking better-known rivals such as JD.com. Last month, Pinduoduo reported that second-quarter revenue had more than doubled from a year earlier. Its \$40 billion market value exceeds eBay's and places it among China's five most valuable internet companies.

Are Pinduoduo products sustainable?

"Pinduoduo has been very successful with their 'team buying' model, and by offering products at the lowest prices, but they need to expand beyond these for long-term sustainability," says Michael Zakkour, coauthor with Dudarenok of New Retail.

Is Pinduoduo gaining market influence in China?

Meanwhile Pinduoduo's social commerce is only gaining sophistication and market influence. Pinduoduo has already aggregated enough consumer insights that they are able to collaborate with and influence manufacturers in China to cater to their user base.

5 · Polycrystalline solar panels are one of the oldest types of solar panel in existence, with cells that are made by melting multiple silicon crystals and combining them in a square mould. ...
