What is solar power?

Solar power is the conversion of sunlight into electricity, either directly using photovoltaic (PV), or indirectly using concentrated solar power (CSP). The research has been underway since very beginning for the development of an affordable, in-exhaustive and clean solar energy technology for longer term benefits.

What is a solar photovoltaic & wind turbine hybrid generation system?

A solar photovoltaic, wind turbine and fuel cell hybrid generation system is able to supply continuous power to load. In this system, the fuel cell is used to suppress fluctuations of the photovoltaic and wind turbine output power. The photovoltaic and wind turbines are controlled to track the maximum power point at all operating conditions.
