

Solar support industry system certification

What is the SEI solar professionals certificate program (SPCP)?

Industry-leading education to meet your solar aspirations The SEI Solar Professionals Certificate Program (SPCP) is a selective admissions program to help ensure the success of our students and provide a quality workforce for the solar industry.

What is a solar certificate program?

This certificate program will expose you to SEI's best classroom curriculum and lab training experience for you and your instructional staff to put on a full solar training program at your school or training organization. "SEI is to Solar as Harvard is to Law."

What makes a good solar design and installation training program?

Solar design and installation training programs that are aligned with regional employer needs and available job opportunities ensure effective training-to-career pipelines. Curriculum should be based on employer-identified skills requirements and delivered in a way that meets the needs of learners.

What is the solar Instructor Training Network?

The Solar Instructor Training Network developed a robust local training network across the United States. During its term, the program partnered with more than 400 community colleges, labor training centers, and technical high schools.

What can I do with a solar certificate?

This online certificate path covers a comprehensive spectrum of grid-direct and battery-based residential and commercial photovoltaic design and installation applications as well as solar business and technical sales, and operations and maintenance within the solar industry.

Is SEI a good school for solar?

"SEI provided a very comprehensive yet understandable course for solar that will no doubt aid in my future endeavors in this industry." "SEI was hands down the right choice for up-to-date, practical, and professional training in the world of photovoltaics."
