

# Waiting for solar power generation at home

How can I get solar energy into my home?

Solar energy is a key way to get more from your property, insure yourself against power outages, and save some money. You can get solar energy into your home by installing panels on your roof, which is the most obvious method. However, there are other options as well.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

Should you wait before going solar?

The cost of solar has dropped by about 3.3% over the past five years. Waiting to go solar may result in missing out on current incentives and higher electricity costs in the future. By going solar now, you can lock in current incentives and protect yourself from rising electricity costs.

Should you wait to install solar panels?

Waiting to install solar panels means waiting to save on your energy bill, and continuing to pay more for that energy as prices rise. In 2022, residential electricity price has increased on average at least by 2.7% when compared to 2021 in the U.S. .

Should you switch to solar energy before moving?

If you plan to move in the next few years, it's ideally better to wait before switching to solar energy to break even on your investment. However, multiple studies have shown that solar increases the value of your home by about 4%. So, it could still pay off to switch to solar energy soon, even if you're planning to move.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Solar panels cost between \$8,500 and \$30,500 or about \$12,700 on average. The price you'll pay depends on the number of solar panels and your location.

In 2022, residential electricity price has increased on average at least by 2.7% when compared to 2021 in the U.S. [3]. In 2021, the average American household's energy bill ...
